Inflation negatively impacts your future income. The value of the amount of money you are saving today will not have the same value in the future. You will not be able to buy as much in the future with each dollar saved. In other words, inflation makes it necessary to save more because your dollars will be worth less in the future.

Current Contributions:

You are **currently contributing** a regular amount of \$6,439 from your salary and an additional \$0 catch-up contribution for a combined Annual Contribution of:

\$6,439

Continuing Contributions:

Your future Thrift Savings Plan projections are based on your annual salary increases, annual TSP contributions, catch-up contributions and, rates of return of each fund. You have chosen to distribute 25.00% into the C fund earning 5.00%, 10.00% into the F fund earning 4.00%, 10.00% into the G fund earning 3.50%, 35.00% into the I fund earning 5.00%, 20.00% into the S fund earning 5.00%, and .00% into the L-2020 Fund. Each quarter, your L-funds allocation will automatically shift to a slightly more conservative mix (less allocated in the C, I, and S funds and more allocated in the F and G funds).

Withdrawal of Funds:

At the age of 56 years and 2 months you elected a lump sum withdrawal of your funds amounting to:

\$290,256

Note: Earnings Rates are hypothetical - not guaranteed. The monthly income illustrated is based on a gross distribution without consideration for income tax.

At retirement, all TSP funds will be transferred into an investment from which a monthly payment of \$1,083.33 will be taken.
